

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

SWEDEN.

Poliomyelitis.

Consul Fuller reports November 17:

Poliomyelitis has been prevalent in Sweden during the present year. The total number of cases reported from May 1 to October 15 was 2,390, of which 339 cases occurred in towns. The greatest number of cases occurred in Jonkoping County, in the consular district of Gothenburg. The first case in the city of Gothenburg occurred in August and, to November 17, 5 cases were reported, the last case in the city being reported November 12. Five cases were brought to Gothenburg for treatment. The disease has not been confined to children but has attacked many adults. The origin of the outbreak has not been determined.

TUNIS.

Status of Cholera.

The following information was received from the ministry of foreign affairs at Paris:

During the period from October 23 to 31, 779 cases of cholera were reported in the Regency of Tunis and during the period from November 1 to 8, 520 cases. The cities of Tunis and Beja were officially declared free from cholera November 3 and the city of Bizerta November 4.

From November 9 to 15, 291 deaths from cholera were reported in the civil jurisdiction of Tunis.

CHOLERA, YELLOW FEVER, PLAGUE, AND SMALLPOX.

REPORTS RECEIVED DURING WEEK ENDED DEC. 15, 1911.

[These tables include cases and deaths recorded in reports received by the Surgeon General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]
